

Discovery Cube offers hands-on science education that delights, challenges, and encourages kids. Discovery Cube has made a positive difference in thousands of lives for 35 years. Our organization achieves this goal through four core initiatives: STEM proficiency, early childhood education, healthy living, and environmental stewardship. These future-forward initiatives inspire educators, their students, and all of us committed to learning for life.

Our original center in Orange County, as well as our newer Los Angeles campus, gives those seeking immersive, interactive science activities a way to jump into the learning fun. In addition to our campuses, educational outreach programs remain a major part of our mission. Bringing a host of experiences directly to learners is essential to achieving the organization's core initiatives. It's a mission that also includes empowering real-world applications by giving learners a chance to make a difference. This vision has made the Discovery Cube a prominent advocate for modern science education over the years. Spotlighting science as a solution and as a force for good is what Discovery Cube so successfully does.

Position:

Do you love fun, hands-on science? Can you help us share your enthusiasm with the next generation of scientists? Are you ready to be one of our teammates that will inspire and motivate youth to love science? If so, we have the job for you!
